Dan's EI ladders
GRPO on his base, his 4,495 targets
GRPO, knockout base, our σ-rich pool
GRPO, full K12 base, his targets
not reached by that x, at his round-16 x
not reached: stopped by the 15 GPU-h cap, short of his ladder
RL ÷ pretraining compute (Dan's rule)
to reach his bar (14 of 106)
