a Design
Full: 155,000 proofs, 10.9% use σ or a variant
1% dose: knockout set with 1,550 σ records restored
Knockout: σ⁺ records removed (16,961), refilled to 155,000
same 9.56M transformer, pretrained from scratch, then 16 rounds of expert iteration (Lean judges every proof)
σ: assume ¬G, refute it, conclude ¬¬G, drop ¬¬ (DN and ¬-introduction stay; 3–4× rarer in the knockout)
b Result
held-out classical theorems proved (of 106; 256 attempts)
