each group's contribution to GRPO − EI: the sum over its problems of Δ / 149, read on the odd attempts (95% intervals)
groups from pass@5 on the even attempts: reliable ≥ 90%, sometimes 20–90%, rarely or never < 20%
Δ pass@1
Δ pass@5
(a) grouped by EI's pass@5 (even attempts)
(b) grouped by mean of both arms' pass@5 (even attempts)
contribution to the gap
(points of the overall Δ)
